

Alison Conner ***Business Manager***

Alison Conner is the Business Manager for the Gateway for Innovation in Nuclear (GAIN). In her role, she manages and implements business, finance and operations of GAIN and the Nuclear Energy Vouchers. She also functions as the Systems Methods and Analysis Group Lead in the Energy and Environment Science and Technology mission directorate at Idaho National Laboratory (INL).

Alison has over 30 years of experience as a systems engineer utilizing advanced systems engineering and project management skills to effectively plan, manage, and conduct multi-disciplined projects at INL.

She holds an MEng in engineering management from University of Idaho and a BS in engineering science from Montana Technological University and is certified as a Project Management Professional by the Project Management Institute.

In her spare time, Alison likes to hike and camp in the summer and cross-country and downhill ski in the winter.
