

Shaping our CARBON-FREE FUTURE

#GAINCarbonFree

Lori A. Braase

Idaho National Laboratory
Program Manager

Lori Braase, an Idaho Falls native, is the Program Manager for the Gateway for Accelerated Innovation in Nuclear (GAIN) initiative, led by the Idaho National Laboratory (INL). She manages and coordinates the GAIN office work scope, schedule, and budget. She works closely with the GAIN director, DOE Office of Nuclear Energy, and national laboratories to streamline processes and communicate effectively with nuclear stakeholders.

As a GAIN liaison for the advanced reactor industry, she identifies strategic and technical recommendations to enable private-public partnerships and foster long-term relationships.

Lori has 29 years of experience at INL providing various nuclear programs with systems engineering, project management, technical integration, and strategic planning expertise. She is a nineteen-year member of the Idaho Section of the American Nuclear Society (ANS) and served 3 years on the board, as well as membership in ANS for most of the last 18 years. Lori has a BBA in Business Management (Idaho State University) and a Master's Certificate in Applied Nuclear Energy.
