

Shaping our CARBON-FREE FUTURE

#GAINCarbonFree

Zeke Hausfather

Director of
Climate and Energy
Breakthrough Institute

Zeke Hausfather is a climate scientist and energy systems analyst whose research focuses on observational temperature records, climate models, and mitigation technologies. He currently serves as the Director of Climate and Energy at the Breakthrough Institute.

He previously spent 10 years working as a data scientist and entrepreneur in the cleantech sector, where he was the lead data scientist at Essess, the chief scientist at C3.ai, and the cofounder and chief scientist of Efficiency 2.0. He also worked as a research scientist with Berkeley Earth, was the senior climate analyst at Project Drawdown, and the US analyst for Carbon Brief.

Zeke has master's degrees in environmental science from Yale University and Vrije Universiteit Amsterdam and a PhD in climate science from the University of California, Berkeley.
