

Develop and export by design, not redesign.

The 3rd Annual Workshop on International Safeguards & Security By Design

September 3-5, 2025
Argonne National Laboratory, Chicago

Brought to you by the U.S. Department of Energy/National Nuclear Security Administration, this invaluable workshop is for developers of advanced and small modular reactors and associated fuel cycle facilities who plan to export globally. Among its critical topics you'll learn:

- Fundamentals of international nuclear safeguards and security.
- Safeguards, security, and safety (3S) interfaces.
- International safeguards requirements, activities and tools.
- Nuclear security design and analysis tools to include cybersecurity fundamentals and frameworks.
- Target set and vital area identification methods for A/SMRs to inform physical protection design.

The 3-day course is free; participants are responsible for travel and lodging. For additional information, scan the QR code below or email Dr. Claudio Gariazzo at cgariazzo@anl.gov.

Register by August 1st using the
