

GAIN Fuel Safety Research Workshop

INL Energy Innovation Laboratory (EIL)

Idaho Falls, ID; May 1- 4, 2017

Welcome to the Idaho National Laboratory! *This is an invitation-only workshop to gather fuel safety needs from the broad range of nuclear industry. The needs will be analyzed relative to the national lab capabilities to help inform program planning and funding. It will also provide a forum to learn about transient testing from a research and regulatory perspective and to participate on a tour of ATR and MFC. We would like to thank those that agreed to present background information, overviews, perspectives, or results.*
